PART 2: SUMMARY DESCRIPTION OF BUSINESS

What is our business?

Turnium develops and commercializes a software platform, being a software-defined wide area networking (“**SD-WAN**”) platform, used to build communication networks that connect a business’ multiple branches or locations to each other as well as to multiple cloud-hosted applications, data, and storage. What are the business objectives that we expect to accomplish using the available funds?

Turnium expects to use the available funds to repay the FirePower Loan and for general working capital purposes. In order to repay the FirePower Loan, no significant event must occur other than closing of the Offering. Turnium expects that the FirePower Loan will be repaid promptly upon closing of the Offering.

The above noted allocation represents Turnium's current intentions with respect to its use of proceeds based on current knowledge, planning and expectations of management of Turnium. Although Turnium intends to expend the proceeds from the Offering as set forth above, there may be circumstances where, for sound business reasons, a reallocation of funds may be deemed prudent or necessary and may vary from that set forth above, as the amounts actually allocated and spent will depend on a number of factors, including Turnium's ability to execute its business plan.

The indebtedness under the FirePower Loan was principally used for general operations including: research and development of new products; public company related expenses including audit and legal work; and other general operations related activities.

Turnium’s condensed interim consolidated financial statements for the six months ended March 31, 2023 and 2022 have been prepared on a going concern basis, which assumes that Turnium will be able to realize its assets and discharge its liabilities in the normal course of business. The Company has restructured its operations during the current financial year to reduce overheads in sales & marketing, administration, finance while it has modestly grown its revenues, resulting in a significant reduction in its negative cash flow from operations. Turnium expects to continue the trend of growing its revenues while some of the prior restructuring efforts will further reduce expenses such that cash flow neutral or positive operations are projected post-closing of the Offering. The full debt exposure of Turnium is less than CAD\$3,000,000 such that the FirePower Loan plus accounts payable older than 45 days will be eliminated.
